

## Cummins Power Generation 36L Oil Capacity 140L Coolant Capacity Genset Open Type For Industrial

Our Product Introduction

more products please visit us on [enginedieselgenerator.com](http://enginedieselgenerator.com)

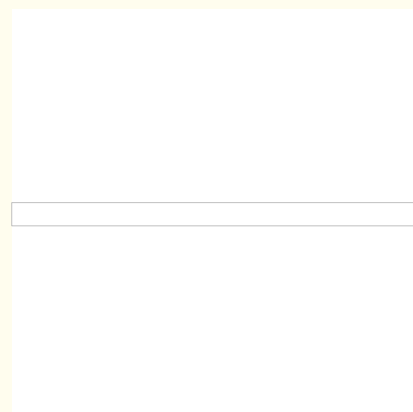

### Basic Information

- Place of Origin: CHINA
- Brand Name: Cummins
- Model Number: FM500-1000GF

### Product Specification

- Type: Diesel Generator
- Engine Brand: Cummins
- Controller: Digital
- Phase No: 3 Phase
- Conditions Of Use: Land Use
- Cooling System: Water-cooled
- Oil Capacity: 36L
- Starting Method: Electric Start
- Highlight: **Cummins genset open type,  
Industrial genset open type**

## Product Description

### Product Description:

The Open Type Diesel Generator is a reliable and efficient power generation solution designed for land use applications. With a rated power output of 600KW, this generator is capable of meeting the energy needs of various settings, from industrial facilities to commercial buildings.

Equipped with a brushless alternator, the Open Type Diesel Generator ensures stable and continuous power supply. The brushless design minimizes maintenance requirements, making this generator a cost-effective choice for long-term power generation needs. With a large coolant capacity of 140L, this diesel generator can effectively manage heat dissipation during operation, ensuring optimal performance even under heavy load conditions. The robust cooling system enhances the durability and reliability of the generator, making it suitable for continuous use in demanding environments.

Designed for land use, the Open Type Diesel Generator is ideal for stationary power generation applications where a reliable power source is essential. Whether used as a primary power supply or as a backup system, this generator offers dependable performance to keep operations running smoothly.

Whether you need a power generation solution for a factory, a data center, a hospital, or any other facility, the Open Type Diesel Generator delivers the performance and reliability you can count on. Its diesel engine provides efficient and cost-effective operation, making it a practical choice for various settings where continuous power supply is crucial.

Invest in the Open Type Diesel Generator for your power generation needs and experience the benefits of a dependable and efficient energy solution. With its high power output, reliable components, and durable construction, this generator is ready to meet the demands of your application and ensure uninterrupted power supply whenever you need it.

### Features:

Product Name: Open Type Diesel Generator

Engine Brand: Cummins

Starting Method: Electric Start

Rated Power: 600KW

Conditions Of Use: Land Use

Cooling System: Water-cooled

### Applications:

The Cummins FM500-1000GF Open Type Diesel Generator, originating from China, is a reliable and powerful generator suitable for various power generation needs. With its 3 Phase configuration and a rated power output of 600KW, this generator is ideal for use in a wide range of applications.

One of the key features of this generator is its open type design, making it perfect for scenarios where easy access and maintenance are essential. The brushless alternator type ensures efficient power generation with minimal maintenance requirements, making it a cost-effective solution for both standby and prime power applications.

With a coolant capacity of 140L and an oil capacity of 36L, the Cummins FM500-1000GF is designed to operate reliably and efficiently even in demanding environments such as factories and industrial facilities. The robust construction and high-quality components of this generator make it a dependable power source for critical operations.

Whether used as a primary power source or for backup power supply, this Cummins diesel generator is suited for a wide range of scenarios. Its versatility and durability make it a popular choice for various industries, including manufacturing plants, data centers, and construction sites.

In factory settings, the FM500-1000GF generator can provide consistent and stable power to keep operations running smoothly. Its open type design allows for easy integration into existing power systems, making it a practical choice for factories looking to enhance their power infrastructure.

Overall, the Cummins FM500-1000GF Open Type Diesel Generator is a reliable and efficient power solution for a variety of applications. Its robust construction, high power output, and ease of maintenance make it an excellent choice for power generation needs in factories and other industrial settings.

### Customization:

Product Customization Services for the Open Type Diesel Generator:

Brand Name: Cummins

Model Number: FM500-1000GF

Place of Origin: CHINA

Engine Brand: Cummins

Oil Capacity: 36L

Conditions Of Use: Land Use

Controller: Digital

Cooling System: Water-cooled

### FAQ:

**Q: What is the brand of this diesel generator?**

A: The brand of this diesel generator is Cummins.

**Q: What is the model number of this diesel generator?**

A: The model number of this diesel generator is FM500-1000GF.

**Q: Where is this diesel generator manufactured?**

A: This diesel generator is manufactured in China.

**Q: What is the capacity of this diesel generator?**

A: The capacity of this diesel generator ranges from 500kVA to 1000kVA.

**Q: Does this diesel generator come with a warranty?**

A: For warranty-related information, please refer to the specific warranty policy provided by the manufacturer.
