

Digital Controller Open Type Diesel Generator 3 Phase Brushless Alternator For Heavy Duty Telecom Applications

Our Product Introduction

more products please visit us on enginedieselgenerator.com

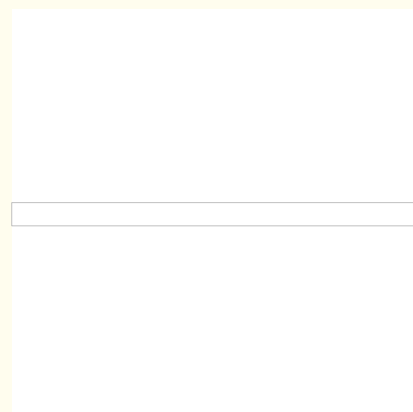

Basic Information

- Place of Origin: CHINA
- Brand Name: Cummins
- Model Number: FM500-1000GF

Product Specification

- Rated Power: 600KW
- Engine Brand: Cummins
- Type: Diesel Generator
- Controller: Digital
- Phase No: 3 Phase
- Starting Method: Electric Start
- Oil Capacity: 36L
- Conditions Of Use: Land Use
- Highlight: **3 Phase Open Diesel Generator,
Brushless Alternator Open Diesel Generator,
Heavy Duty Open Type Generator**

Product Description

Product Description:

The Open Type Diesel Generator with Cummins engine is a reliable power solution designed for heavy enterprises requiring a consistent power supply. With a rated power of 600KW, this generator is capable of meeting the demanding energy needs of large-scale operations. Engineered for land use, this diesel generator is suitable for various applications in industrial settings, construction sites, data centers, and more. The robust Cummins engine ensures high performance and efficiency, making it a dependable source of power for critical operations.

The generator is equipped with a spacious oil capacity of 36L, allowing for extended operation without the need for frequent refills. This feature enhances the generator's efficiency and ensures smooth operation even under continuous heavy loads.

For optimal cooling performance, the generator is integrated with a water-cooled system. This advanced cooling mechanism helps regulate the temperature of the engine during operation, preventing overheating and ensuring long-term durability.

In terms of architecture, the Open Type Diesel Generator features a sturdy and durable construction that can withstand the rigors of heavy industrial use. Its robust design is built to last, providing reliable power generation for years to come.

Whether used as a primary power source or for backup during outages, this diesel generator offers a dependable solution for powering essential equipment and machinery in diverse industrial environments. Its high power output and efficiency make it an ideal choice for heavy enterprises that require consistent and uninterrupted power supply.

Features:

Product Name: Open Type Diesel Generator

Rated Power: 600KW

Coolant Capacity: 140L

Phase No: 3 Phase

Oil Capacity: 36L

Alternator Type: Brushless

Applications:

Cummins Open Type Diesel Generator FM500-1000GF is a reliable power solution designed for various architecture applications. With its origins in China, this generator offers a seamless electric start, making it convenient for quick power access in architectural settings. Engineered by Cummins, a trusted brand in the industry, this generator ensures consistent performance and durability in demanding architecture environments. The digital controller enables precise monitoring and control, enhancing the overall efficiency of power management.

The generous coolant capacity of 140L ensures optimal temperature regulation, ideal for sustained operation in architecture projects where continuous power supply is crucial. Additionally, the 36L oil capacity provides sufficient lubrication to the engine, promoting smooth and reliable performance over extended periods.

Whether it's a construction site, architectural design studio, or residential development, the Cummins FM500-1000GF diesel generator is well-suited for a wide range of architecture scenarios. Its robust build and powerful capabilities make it a dependable energy source for various architecture-related tasks.

From powering architectural lighting systems to running essential equipment in architectural workshops, this open type diesel generator proves to be a versatile and essential tool in the architecture industry. Its dependable electric start and Cummins engine brand ensure reliable power supply in critical architecture projects.

Overall, the Cummins Open Type Diesel Generator FM500-1000GF is a high-quality solution for architecture professionals seeking a dependable power source with advanced features and reliable performance.

Customization:

Our Product Customization Services for the Open Type Diesel Generator include:

Brand Name: Cummins

Model Number: FM500-1000GF

Place of Origin: CHINA

Starting Method: Electric Start

Type: Diesel Generator

Rated Power: 600KW

Cooling System: Water-cooled

Conditions Of Use: Land Use

Power generation, Heavy enterprise, open

FAQ:

Q: What is the brand of this diesel generator?

A: The brand of this diesel generator is Cummins.

Q: What is the model number of this diesel generator?

A: The model number of this diesel generator is FM500-1000GF.

Q: Where is this diesel generator manufactured?

A: This diesel generator is manufactured in China.

Q: What is the power output range of this diesel generator?

A: The power output range of this diesel generator is between 500kVA to 1000kVA.

Q: Does this diesel generator come with a warranty?

A: For warranty-related inquiries, please refer to the warranty information provided by the manufacturer.
