

## 36L Oil Capacity Open Type Diesel Generator With Water Cooled Cooling System And Brushless Alternator

Our Product Introduction

more products please visit us on [enginedieselgenerator.com](http://enginedieselgenerator.com)

### Basic Information

- Place of Origin: CHINA
- Brand Name: Cummins
- Model Number: FM500-1000GF

### Product Specification

- Engine Brand: Cummins
- Starting Method: Electric Start
- Conditions Of Use: Land Use
- Oil Capacity: 36L
- Coolant Capacity: 140L
- Alternator Type: Brushless
- Type: Diesel Generator
- Cooling System: Water-cooled
- Highlight: **Brushless Alternator Open Diesel Generator ,  
Water cooled generator open type**

## Product Description

### Product Description:

The Open Type Diesel Generator is a reliable power solution designed for various applications, including construction sites, heavy enterprises, and industrial settings. Equipped with a Brushless alternator type, this generator ensures efficient power generation with minimal maintenance requirements.

The diesel generator has a substantial Oil Capacity of 36 liters, providing ample lubrication for the engine to operate smoothly and withstand heavy-duty usage typical in construction sites and heavy enterprises. This generous oil capacity contributes to the longevity and durability of the generator, making it a dependable source of power in demanding environments.

With a Phase No of 3 Phase, this diesel generator is capable of delivering balanced power output suitable for running multiple machinery, equipment, and tools simultaneously. This makes it an ideal power solution for construction sites and heavy enterprises where a reliable and stable power supply is essential for uninterrupted operations.

Moreover, the Coolant Capacity of 140 liters in this generator ensures effective cooling of the engine during prolonged operation, especially in high-temperature environments commonly found in construction sites and heavy enterprises. The ample coolant capacity helps maintain optimal engine temperature, preventing overheating and ensuring continuous power generation.

The Open Type Diesel Generator features an engine from the renowned brand Cummins, known for its robust and high-performance diesel engines. The Cummins engine in this generator delivers exceptional power output, fuel efficiency, and reliability, making it a preferred choice for demanding applications in construction sites and heavy enterprises.

Overall, the Open Type Diesel Generator is a powerful and dependable power solution suitable for various industrial applications, including construction sites and heavy enterprises. With its Brushless alternator type, substantial oil and coolant capacities, 3 Phase power capability, and reliable Cummins engine, this generator offers reliable and efficient power generation for demanding environments.

### Features:

Product Name: Open Type Diesel Generator

Engine Brand: Cummins

Controller: Digital

Phase No: 3 Phase

Type: Diesel Generator

Alternator Type: Brushless

### Applications:

The Cummins FM500-1000GF Open Type Diesel Generator is a high-quality power generation solution suitable for a variety of applications. With its reliable Cummins engine, this generator is ideal for heavy enterprises, construction sites, and other land use scenarios.

Designed and manufactured in CHINA, this generator is built to withstand demanding conditions and provide continuous power supply when and where it is needed. The 3-phase configuration ensures stable and efficient power output, making it a perfect choice for industrial and commercial settings.

Featuring a generous oil capacity of 36L and a coolant capacity of 140L, the Cummins FM500-1000GF Open Type Diesel Generator is equipped to handle long hours of operation without compromising performance. Whether used as a primary power source or as a backup during emergencies, this generator delivers consistent power output to keep operations running smoothly.

Its open type design allows for easy maintenance and servicing, making it a practical choice for businesses looking for a reliable and cost-effective power generation solution. The Cummins brand name is synonymous with durability and performance, ensuring that the FM500-1000GF meets the highest standards of quality and reliability.

For heavy enterprises that require a dependable power source, construction sites in need of reliable electricity supply, or any land use scenario that demands a robust generator, the Cummins FM500-1000GF Open Type Diesel Generator is the perfect choice. Trust in Cummins to keep your operations powered and running smoothly.

### Customization:

Enhance your power generation experience with our Product Customization Services for the Cummins Open Type Diesel Generator.

Designed for reliability and efficiency, the Cummins FM500-1000GF generator is ideal for various applications at construction sites, factories, and more.

Customize your generator with features such as a Brushless Alternator Type, Electric Start for easy operation, and a robust 36L oil capacity. With a 3 Phase configuration and the trusted Cummins engine brand, rest assured that your power needs will be met with excellence.

Originating from CHINA, our Cummins Open Type Diesel Generator offers a tailored solution for your specific requirements, ensuring seamless performance in diverse settings.

### FAQ:

**Q: What is the brand of this diesel generator?**

**A: The brand of this diesel generator is Cummins.**

**Q: What is the model number of this diesel generator?**

**A: The model number of this diesel generator is FM500-1000GF.**

**Q: Where is this diesel generator manufactured?**

**A: This diesel generator is manufactured in China.**

**Q: What is the power output range of this diesel generator?**

**A: The power output range of this diesel generator is between 500kVA to 1000kVA.**

Q: Does this diesel generator come with a warranty?  
A: Please refer to the warranty information provided by the manufacturer for details on the warranty coverage.
